

## ISO9241

- **ISO 9241 Standards Ergonomics of Human System** Interaction: Points of interest to most of you is the 100 series: Software ergonomics

Within those series, the standard currently includes the following parts:

- Part 110: Dialogue principles
- Part 129: Guidance on software individualization
- Part 151: Guidance on World Wide Web user interfaces
- Part 171: Guidance on software accessibility

To access it

Log into the portal

Select Library & Computing

From the e-library section select [Databases, Journals and e-books.](#)

Select [OHSIS \(Occupational Health and Safety Information Service\)](#)

You will then see an Authentication check page. Select [University of Greenwich – Open Athens](#) from the drop down menu.

Then log in with your portal details.

In the box titled: [Access Your Individual Products](#), select the second option down on the right The Occupational Health and Safety International Service

Once in you can use the simple search on the right for a specific search eg 9241 or use the advanced search document text option and type ergonomic
